

## LORD ROBERT CECIL'S DISARMAMENT PLAN

Guarantees to Protect Nations in Case of an Unprovoked Attack.

BY REGIONAL TREATIES

European Assistance Limited to Continent and American to Americas.

NOT CONFINED TO LEAGUE

Lord Esher's Proposal Specifies Number of Troops Allowed in Europe.

Special Cable to THE NEW YORK HERALD.  
Copyright, 1922, by THE NEW YORK HERALD.  
New York Herald Bureau.

The text of Lord Robert Cecil's new peace pact to secure general disarmament, conditional upon a guaranty of defense, in the event that a disarmed nation is the victim of an unprovoked attack, which was presented yesterday in the armaments commission of the League of Nations, was made public today.

Provision is made for the voluntary adherence of the United States and other nations not members of the league, America not being called upon to come to the aid of attacked European nations. The other main points in Lord Cecil's proposal are as follows:

The contracting parties agree that if any one of them is attacked the others shall take such action as is most effective for the defense of the attacked party, provided that the naval, military and aerial forces of that party have been reduced in accordance with the terms of the treaty. In consideration of this undertaking each party forthwith shall reduce its forces to the extent set forth.

A permanent military commission will watch for circumstances likely to disturb world peace and advise the council of the league what action to take. If the council, by a three-fourths majority, think that the preparations of one nation menace another nation they shall make representations to the offending Power and adopt plans for assisting the menaced Power.

A European State shall not be bound to furnish assistance outside Europe, nor a North or South American State outside North or South America.

Avoids Article X Objection.

PARIS, July 4.—The principal American objection to Article X of the League of Nations, it is held, would be met by this regional defensive plan, inasmuch as the United States is already committed to a similar policy on the American continent under the Monroe Doctrine, and Lord Robert's plan is designed to limit each nation's obligations to defensive alliances to such regions. The reduction of armaments would

## GERMAN LABOR DEMANDS PROTECTION FOR REPUBLIC

Workers Numbering 300,000 Invade Fashionable Quarters in Berlin in Mute Appeal and Urge Arrest of Hindenburg and Ludendorff.

BERLIN, July 4 (Associated Press).—Radical and Socialist Germany and organized labor joined in public demonstrations throughout the country today in an effort to impress the Government with the strength of the workers while the Government is shaping its program for the defense of the republic. Simultaneously with the processions and assemblies there was a general cessation of work in all branches of industry during the afternoon.

Breaking the precedent of years by ignoring the spurious Lustgarten for their meeting, Berlin's demonstrators, numbering at least 300,000, invaded the thoroughfares of the capital's fashionable West End, meeting at the Kaiser Wilhelm Memorial Church. By 3 o'clock the space surrounding the church was jammed, the overflow extending for blocks in each of the six radiating streets.

No speeches were made, the demonstration being purely a mute shout except for group singing and the playing of two bands. The "Internationale" figured prominently in the singing and

be determined in advance and carefully checked up, and if any nation exceeded the amount of armaments allowed under the agreement it would be subject to suspension from protection and to penalties provided for under Article XVI of the Covenant of the League of Nations. The reduction would apply to naval, military and air forces.

All disputes as to the meaning and effect of the treaty, except in deciding whether armaments exceed the amount allowed, shall be submitted to the Permanent Court of International Justice for final decision.

### Lord Esher's Plan.

The plan submitted by Lord Esher is only in outline form. It provides for a ratio similar to that stipulated in the Washington Conference agreement and gives the tentative ratios as follows: each unit representing 10,000 men: France, 6 units; Italy, 4; Poland, 4; Czechoslovakia, Great Britain, Greece, Jugoslavia, Holland, Rumania and Spain, 3 each; Belgium, Denmark, Norway, Sweden and Switzerland, 2 each; Portugal, 1 unit; and Germany, Austria, Bulgaria and Hungary to retain their forces as fixed by the peace treaties.

These ratios would apply only to the home forces. Each nation would be free to determine the number necessary for colonial and overseas purposes. This

## FRANCE WARNS BERLIN NOT TO PAY UKRAINE

Told She Must Submit All Payments Outside Treaty.

PARIS, July 4 (Associated Press).—The Allied Reparations Commission sent a note today to the German Government warning it to pay over no money to the Ukrainian Government in pursuance of the projected treaty between Germany and the Ukraine, details of which have been brought to the commission's attention.

The note says the commission understands that Germany has agreed to pay the Ukraine 400,000,000 marks, and it reminds the German Government that it undertook by its letter of March 22 to make no payments abroad outside the terms of the Treaty of Versailles without referring them to the commission.

The French Cabinet today decided to place immediately before the Reparations Commission the reparations project providing for the extensive use of German labor and material throughout France for the rebuilding of railways, waterways and other public works at a cost of 18,000,000,000 francs.

## MEXICAN BANDITS ATTACK W. O. JENKINS

Bielaski and Wife Constantly Shadowed in Mexico City.

Special Dispatch to THE NEW YORK HERALD.  
MEXICO CITY, July 4.—W. O. Jenkins, formerly the American Consul or Agent at Puebla, was attacked yesterday by assassins near Puebla, but escaped, though two men who were with him were killed. Jenkins was kidnapped and held for ransom by Mexican bandits in 1919.

A. Bruce Bielaski is under constant surveillance, he and his wife being shadowed, even within their hotel, by Mexican Federal agents. To-day they were followed by the American Embassy reception, losing track of Mr. Bielaski when they followed the automobile in which he had driven to the Embassy, for it had been lent to him by the foreign correspondents.

The Bielaski case has been transferred from Federal jurisdiction to the civil courts of the State of Morelos in an effort to prove that the kidnapping was a crime.

William O. Jenkins, then United States Consul Agent at Puebla, was held by bandits in October, 1919, in the

mountains south of that city. His captors demanded payment of 200,000 pesos and he was released when his attorney paid the money at the bandits' hiding place. Later he was charged by the local Mexican authorities with complicity in the kidnapping and was imprisoned.

## BRITISH CABINET CHANGES REPORTED

Balfour to Succeed Curzon as Foreign Secretary.

Special Cable to THE NEW YORK HERALD.  
Copyright, 1922, by THE NEW YORK HERALD.  
New York Herald Bureau.  
London, July 4.

The Government today denied that changes were contemplated in the personnel of the Cabinet, but the denial is not taken seriously. It is probable that the Earl of Balfour will succeed Marquis Curzon as Foreign Secretary, though Lord Curzon asserts that he will be well and fit to attend to his duties in the House of Lords in a few days.

Edward Shortt, the Home Secretary, is to become a Judge, thereby fulfilling his life ambition. Stanley Baldwin, president of the Board of Trade, also will quit owing to differences of opinion with the other members of the Government on the tariff question.

The post of Chief Secretary for Ireland, held by Sir Hamar Greenwood, soon will be eliminated. It is likely that Mr. Baldwin will go to the Home Office and C. A. McCurdy, Joint Parliamentary Secretary for the Treasury, or Sir Hamar Greenwood to the Board of Trade.

According to a telephone message from Frankfurt to The New York Herald of Paris rioting in the streets there commenced at 9 o'clock this evening. The crowds were dispersed by the police, firing revolvers. Several are reported killed and many wounded.

The day was comparatively quiet, but at nightfall crowds gathered, shouting Socialist calls and some singing the "Internationale." Suddenly they passed the police lines and started tearing down signboards bearing the names of former imperial furnishers. Excitement was reported to be intense, but it was said that the police had resumed control, at least temporarily.

## RIOTING AT FRANKFORT; ATTACK ON IMPERIALISTS

Socialist Demonstration in Which Several Are Killed.

## The man who puts the bubbles in it

YOU have perhaps noticed the silvery bubbles in Clicquot Club Ginger Ale and that they stay in it a long time.

"Putting in the bubbles" is an important part of making Clicquot. The spring water, drawn from the bed-rock through aluminum pipes, is quite cold but not cold enough.

By refrigeration, the temperature of the water is forced down almost to freezing. Then the water is carbonated. That's what makes Clicquot so lively, so full of sparkle.

Warmer water would not take the carbonation so well, nor would it hold it so long after the bottle is opened. So the man who puts the bubbles in Clicquot watches the thermometers and keeps the temperature just right.

And every part of the making of Clicquot Club is just as carefully guarded. No ginger but real Jamaica ginger is used, only pure cane sugar sweetens it, and the happy blend of Clicquot is made with the addition of fruit juices. No wonder they all like it.

Order Clicquot Club Ginger Ale by the case. Should you desire a change in flavors at times, you can get a mixed case with Ginger Ale, Sarsaparilla, Birch Beer, and Root Beer.

## What Is Cement?

What is this finer-than-flour building material called cement, that you can mix with water, sand, and stone or pebbles, and cast into all sorts of shapes that become as hard and enduring as solid rock?

Portland cement consists principally of silica, lime, and alumina. In cement manufacture these are obtained from (1) Cement rock and limestone; (2) Limestone or marl and shale or clay; (3) Blast-furnace slag and limestone.

First the rock is quarried and transported to the mill. Then it is ground to a powder, analyzed, and the several ingredients mixed in accurate proportions.

Next it is subjected to long and gradually increasing heat until, at about 3,000 degrees Fahrenheit, the mixed materials decompose and fuse into hard balls, known as clinker.

Then this hard clinker is cooled, mixed with a definite proportion of gypsum, and again ground to a powder so fine that at least 78 per cent of it will pass through a sieve having 40,000 holes to the square inch.

Finally this finished product must be analyzed to determine that it conforms to the exacting specification requirements of cement manufacture, packed in bags and placed in cars for shipment.

The manufacture of cement is a complex process involving great care, skill and expense, and requiring an enormous capital investment.

This Is the Age of Cement
